

JUNIOR HIGH SCHOOL 1

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION																											
UNIT 1.1 NUMBERS AND NUMERALS	The pupil will be able to: 1.1.1 count and write numerals up to 100,000,000	Counting and writing numerals from 10,000,000 to 100,000,000	<p>TLMs: Abacus, Colour-coded materials, Place value chart</p> <p>Guide pupils to revise counting and writing numerals in ten thousands, hundred thousands and millions.</p> <p>Using the idea of counting in millions, guide pupils to recognize the number of millions in ten million as $(10,000,000 = 10 \times 1,000,000)$</p> <p>Using the non-proportional structured materials like the abacus or colour-coded materials, guide pupils to count in ten millions.</p> <p>Show, for example, 54,621,242 on a place value chart.</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th colspan="3">Millions periods</th> <th colspan="3">Thousands periods</th> <th colspan="3">Hundreds periods</th> </tr> <tr> <th>H</th><th>T</th><th>O</th> <th>H</th><th>T</th><th>O</th> <th>H</th><th>T</th><th>O</th> </tr> </thead> <tbody> <tr> <td></td><td>5</td><td>4</td> <td>6</td><td>2</td><td>1</td> <td>2</td><td>4</td><td>2</td> </tr> </tbody> </table> <p>Point out that the commas between periods make it easier to read numerals.</p> <p>Assist pupils to read number names of given numerals (E.g. 54,621,242) as; <i>Fifty four million, six hundred and twenty one thousand, two hundred and forty two.</i></p> <p>Using the abacus or place value chart guide pupils to find the place value of digits in numerals up to 8-digits.</p> <p>Discuss with pupils the value of digits in given numerals.</p>	Millions periods			Thousands periods			Hundreds periods			H	T	O	H	T	O	H	T	O		5	4	6	2	1	2	4	2	Let pupils: read and write number names and numerals as teacher calls out the digits in a given numeral (E.g. 72,034,856) bring in news papers or magazines that mention numbers in millions to record) mention numbers they hear on TV and radio reports (this can be taken as projects to be carried out weekly for pupils; investigate types of numbers that appear in government's budgets, elections results, census reports, etc. write the value of digits in given numerals
	Millions periods			Thousands periods			Hundreds periods																								
H	T	O	H	T	O	H	T	O																							
	5	4	6	2	1	2	4	2																							
1.1.2 identify and explain the place values of digits in a numeral up to 100,000,000	Place value	Place value	Using the abacus or place value chart guide pupils to find the place value of digits in numerals up to 8-digits. Discuss with pupils the value of digits in given numerals.	write the value of digits in given numerals																											

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 1.1 (CONT'D) NUMBERS AND NUMERALS	<p>The pupil will be able to:</p> <p>1.1.3 use < and > to compare and order numbers up to 100,000,000</p> <p>1.1.4 round numbers to the nearest ten, hundred, thousand and million</p> <p>1.1.5 identify prime and composite numbers</p>	<p>Comparing and Ordering numbers up to 100,000,000</p> <p>Rounding numbers to the nearest ten, hundred, thousand and million</p> <p>Prime and Composite numbers</p>	<p>E.g. in 27,430,561 the value of 6 is 60, the value of 3 is 30,000, the value of 7 is 7,000,000, etc</p> <p>Discuss with pupils the difference between the place value of a digit in a numeral and the value of a digit in a numeral.</p> <p>Guide pupils to use less than (<) and the greater than (>) symbols to compare and order whole numbers, using the idea of place value.</p> <p>Guide pupils to use number lines marked off by tens, hundreds, thousands, and millions to round numerals to the nearest ten, hundred, thousand, and million.</p> <p>Using the number line guide pupils to discover that;</p> <ul style="list-style-type: none"> (i) numbers greater than or equal to 5 are rounded up as 10 (ii) numbers greater than or equal to 50 are rounded up as 100 (iii) numbers greater than or equal to 500 are rounded up as 1000 <p>Guide pupils to use the sieve of Eratosthenes to identify prime numbers up to 100.</p> <p>Discuss with pupils that a prime number is any whole number that has only two distinct factors-itself and 1. A composite number is any whole number other than one that is not a prime number.</p>	<p>Let pupils:</p> <p>compare and order given whole numbers (up to 8-digits)</p> <p>write given numerals to the nearest ten, hundred, thousand, or million</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils:
UNIT 1.1 (CONT'D) NUMBERS AND NUMERALS	<p>1.1.8 identify and use the LCM of two or three natural numbers to solve problems</p> <p>1.1.9 carry out the four operations on whole numbers including word problems</p>	<p>Least Common Multiples (LCM) up to 2-digit numbers</p> <p>Addition, Subtraction, Multiplication and Division of whole numbers including word problems</p>	<p>Guide pupils to find the Least Common Multiple (LCM) of given natural numbers by using;</p> <ul style="list-style-type: none"> • Multiples; E.g. 6 and 8 <p>Set of multiples of 6 = {6, 12, 18, 24, 30, 36, 42, 48, ...}</p> <p>Set of multiples of 8 = {8, 16, 24, 32, 40, 48, ...}</p> <p>Set of common multiples = {24, 48, ...}</p> <p>L.C.M of 6 and 8 = {24}</p> <ul style="list-style-type: none"> • Product of prime factors; E.g. 30 and 40 <p>Product of prime factors of 30 = $2 \times 3 \times 5$</p> <p>Product of prime factors of 40 = $2 \times 2 \times 2 \times 5$</p> <p>$\therefore$ L.C.M of 30 and 40 = $2 \times 2 \times 2 \times 3 \times 5 = 120$</p> <p>Guide pupils to Pose word problems involving LCM for pupils to solve</p> <p>Guide pupils to add and subtract whole numbers up to 8-digits</p> <p>Guide pupils to multiply 4-digit whole numbers by 3-digit whole numbers up to the product 100,000,000</p> <p>Guide pupils to divide 4-digit whole numbers by 1 or 2-digit whole numbers with or without remainders</p> <p>Pose word problems involving addition, subtraction, multiplication and division of whole numbers for pupils to solve</p>	<p>find the L.C.M of two or three natural numbers</p> <p>solve word problems involving L.C.M</p> <p>E.g. Dora and her friend are walking through the sand. Dora's footprints are 50cm apart and her friend's footprints are 40cm apart. If her friend steps in Dora's first footprint. What is the minimum number of steps that her friend should take before their footprints match again?</p> <p>add and subtract given 8-digit whole numbers</p> <p>multiply given 4-digit whole numbers by 3-digit whole numbers</p> <p>divide given 4-digit numbers by 1 or 2 digit numbers</p> <p>solve word problems involving addition, subtraction, multiplication and division of whole numbers.</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION								
	The pupil will be able to:			Let pupils:								
UNIT 1.1 (CONT'D) NUMBERS AND NUMERALS	<p>1.1.10 state and use the properties of basic operations on whole numbers to solve problems</p> <p>1.1.11 find good estimates for the sum, product and quotient of natural numbers</p>	<p>Properties of operations</p> <p>Estimation of sum, product and quotient of natural numbers</p>	<p>Guide pupils to establish the commutative property of addition and multiplication i.e. $a + b = b + a$ and $a \times b = b \times a$</p> <p>Guide pupils to establish the associative property of addition and multiplication. i.e. $(a + b) + c = a + (b + c)$ and $(a \times b) \times c = a \times (b \times c)$</p> <p>Guide pupils to establish the distributive property i.e. $a \times (b + c) = (a \times b) + (a \times c)$</p> <p>Guide pupils to establish the zero property (identity) of addition. i.e. $a + 0 = 0 + a = a$, therefore zero is the identity element of addition</p> <p>Guide pupils to establish the identity property of multiplication. i.e. $a \times 1 = 1 \times a = a$, therefore the identity element of multiplication is 1</p> <p>Guide pupils to find out the operations for which various number systems are closed.</p> <p>Discuss with pupils that an estimate is only an approximate answer to a problem. The estimate may be more or less than the actual.</p> <p>To find the estimate of a sum, guide pupils to round up or down each addend and add. Example;</p> <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;"><u>Actual</u></td> <td style="text-align: center;"><u>Estimate</u></td> </tr> <tr> <td style="text-align: center;">5847</td> <td style="text-align: center;">6000</td> </tr> <tr> <td style="text-align: center;">+ 8132</td> <td style="text-align: center;">+8000</td> </tr> <tr> <td style="text-align: center;"><u>13,979</u></td> <td style="text-align: center;"><u>14,000</u></td> </tr> </table>	<u>Actual</u>	<u>Estimate</u>	5847	6000	+ 8132	+8000	<u>13,979</u>	<u>14,000</u>	<p>Find the value of n if $4 \times n = 6 \times 4$.</p> <p>Find which combination of sums will make the multiplication easier in the sum $2 \times 4 \times 9 \times 25$?</p> <p>Put in brackets to make the sentence correct:</p> <p>i. $2 \times 3 + 4 = 14$ ii. $6 + 4 \times 3 + 2 = 20$ iii. $36 = 4 \times 3 + 6 \times 4$</p> <p>What should be in the brackets to make the sentence true? $9 \times (2+5) = (9 \times 2) + (\quad)$</p> <p>estimate a given sum, product or quotient</p> <p>solve real life problems involving estimation</p>
<u>Actual</u>	<u>Estimate</u>											
5847	6000											
+ 8132	+8000											
<u>13,979</u>	<u>14,000</u>											

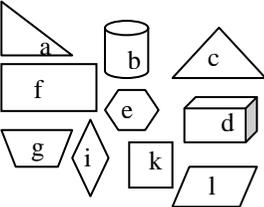

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION								
	The pupil will be able to:			Let pupils:								
UNIT 1.1 (CONT'D) NUMBERS AND NUMERALS			<p>Guide pupils to use rounding up or down to estimate products. Example;</p> <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;"><u>Actual</u></td> <td style="text-align: center;"><u>Estimate</u></td> </tr> <tr> <td style="text-align: center;">327</td> <td style="text-align: center;">300</td> </tr> <tr> <td style="text-align: center;">x2</td> <td style="text-align: center;">x2</td> </tr> <tr> <td style="text-align: center;"><u>654</u></td> <td style="text-align: center;"><u>600</u></td> </tr> </table> <p>Guide pupils to use multiples of ten to estimate a 2-digit quotient. E.g. $478 \div 6$</p> <p style="text-align: center;">$70 \times 6 = 420$ $80 \times 6 = 480$</p> <p>Guide pupils to identify that since 478 is between 420 and 480, the quotient will be less than 80 but greater than 70.</p> <p>Guide pupils to use multiples of 100 to estimate a 3-digit quotient. E.g. $5372 \div 6$</p> <p style="text-align: center;">$700 \times 6 = 4200$ $800 \times 6 = 4800$ $900 \times 6 = 5400$</p> <p>Guide pupils to identify that since 5372 is between 4800 and 5400, the quotient will be less than 900 but greater than 800.</p> <p>Pose real life problems involving estimation for pupils to solve.</p> <p>E.g. ask pupils to find from a classroom shop, the cost of a bar of soap. Pupils then work out, how much they will need approximately, to be able to buy four bars of soap</p>	<u>Actual</u>	<u>Estimate</u>	327	300	x2	x2	<u>654</u>	<u>600</u>	
<u>Actual</u>	<u>Estimate</u>											
327	300											
x2	x2											
<u>654</u>	<u>600</u>											

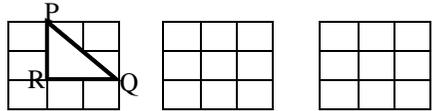

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 1.2 (CONT'D) SETS	The pupil will be able to:		<p>Introduce the intersection symbol '\cap' and write A intersection B as $A \cap B = \{1, 12\}$.</p> <p>Let pupils list all the members of two sets without repeating any member to form a new set.</p> <p>Explain that this new set is called the union of sets A and B. It is written as $A \cup B$ and read as A union B.</p>	Let pupils:
UNIT 1.3 FRACTIONS	1.3.1 find the equivalent fractions of a given fraction	Equivalent fractions	<p>TLMs: Strips of paper, Fraction charts, Addition machine tape, Cuisenaire rods, etc.</p> <p>Revise the concept of fractions with pupils</p> <p>Guide pupils to write different names for the same fraction using concrete and semi-concrete materials.</p> <p>Assist pupils to determine the rule for equivalent fractions i.e. $\frac{a}{b} = \frac{a}{b} \times \frac{c}{c}$</p> <p>Thus to find the equivalent fraction of a given fraction, multiply the numerator and the denominator of the fraction by the same number.</p>	write equivalent fractions for given fractions
	1.3.2 compare and order fractions	Ordering fractions	<p>Using the concept of equivalent fractions involving the LCM of the denominators of fractions, guide pupils to compare two fractions.</p> <p>E.g. Arrange the following fractions in descending order:</p> $\frac{5}{6}, \frac{7}{8}, \frac{3}{4}$ <p>LCM of 6, 8 and 4 is 24, the equivalent fractions</p>	arrange a set of given fractions in <ul style="list-style-type: none"> • ascending order • descending order

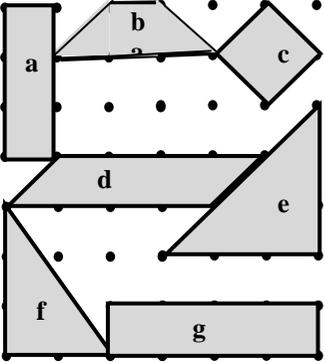

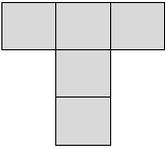

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils:
UNIT 1.3 (CONT'D) FRACTIONS	1.3.3 add and subtract fractions with 2-digit denominators	Addition and subtraction of fractions including word problems	<p>are $\frac{20}{24}, \frac{21}{24}, \frac{18}{24}$ and the descending order is $\frac{3}{4}, \frac{5}{6}, \frac{7}{8}$</p> <p>Guide pupils to order fractions in ascending and descending (order of magnitude) using concrete and semi concrete materials as well as charts showing relationships between fractions.</p> <p>Using the concept of equivalent fractions involving the LCM of the denominators of fractions, guide pupils to add and subtract fractions with 2-digit denominators. E.g. (1) $\frac{2}{15} + \frac{1}{12}$ LCM of 15 and 12 is 60; the equivalent fractions are $\frac{8}{60}$ and $\frac{5}{60}$ so $\frac{2}{15} + \frac{1}{12} = \frac{8}{60} + \frac{5}{60} = \frac{13}{60}$</p> <p><i>similarly</i> $\frac{2}{15} - \frac{1}{12} = \frac{8}{60} - \frac{5}{60} = \frac{3}{60}$</p> <p>Assist pupils to use the concept of Least Common Multiple (L.C.M) to write equivalent fractions for fractions to be added or subtracted.</p> <p>Pose word problems involving addition and subtraction of fractions for pupils to solve.</p>	solve word problems involving addition and subtraction of fractions

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION												
	The pupil will be able to:			Let pupils:												
UNIT 1.3 (CONT'D) FRACTIONS	1.3.4 multiply fractions	Multiplication of fractions including word problems	<p>Revise with pupils multiplication of a fraction by a whole number and vice versa</p> <p>E.g. (i) $\frac{3}{4} \times 8$ (ii) $12 \times \frac{2}{3}$</p> <p>Guide pupils to multiply a fraction by a fraction, using concrete and semi-concrete materials as well as real life situations.</p> <p>Perform activities with pupils to find a general rule for multiplying a fraction by a fraction as</p> $\frac{a}{b} \times \frac{c}{d} = \frac{ac}{bd}$ <p>Let pupils discover that to multiply a fraction by a fraction, find:</p> <p>(i) the product of their numerators</p> <p>(ii) the product of their denominators</p> <p>Pose word problems involving multiplication of fractions for pupils to solve.</p>	solve word problems involving multiplication of fractions												
	1.3.5 divide fractions	Division of fractions including word problems	<p>Guide pupils to divide a whole number by a fraction by interpreting it as the number of times that fraction can be obtained from the whole number.</p> <p>E.g. $3 \div \frac{1}{4}$ can be interpreted as “how many one-fourths pieces are there in 3 wholes?”</p> <table border="1" data-bbox="1162 1171 1653 1217"> <tr> <td>$\frac{1}{4}$</td> <td>$\frac{1}{4}$</td> <td>$\frac{1}{4}$</td> <td>$\frac{1}{4}$</td> </tr> </table> <table border="1" data-bbox="1162 1230 1653 1276"> <tr> <td>$\frac{1}{4}$</td> <td>$\frac{1}{4}$</td> <td>$\frac{1}{4}$</td> <td>$\frac{1}{4}$</td> </tr> </table> <table border="1" data-bbox="1162 1289 1653 1335"> <tr> <td>$\frac{1}{4}$</td> <td>$\frac{1}{4}$</td> <td>$\frac{1}{4}$</td> <td>$\frac{1}{4}$</td> </tr> </table> <p>From the illustration, there are 12 one-fourths pieces in 3 wholes.</p>	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	<p>divide:</p> <p>(i) a whole number by a fraction</p> <p>(ii) a fraction by a whole number</p> <p>(iii) a fraction by a fraction</p> <p>solve word problems involving division of fractions</p>
$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$													
$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$													
$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{4}$													

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils:
UNIT 1.3 (CONT'D) FRACTIONS			<p>Guide pupils to use the reciprocal of a number (multiplicative inverse) in re-writing and solving the division sentence (Note: The product of a number and its reciprocal is 1).</p> <p>$3 \div \frac{1}{4} = \square$ can also be interpreted as</p> <p>$\square \times \frac{1}{4} = 3$, i.e. "what times $\frac{1}{4}$ is 3?".</p> <p>Multiply both sides of by the reciprocal</p> $\square \times \frac{1}{4} \times \frac{4}{1} = 3 \times \frac{4}{1}$ $\square = 12$ <p>Also $3 \div \frac{1}{4}$ can be written as $\frac{3}{1} \div \frac{1}{4}$ or $\frac{3}{1} \times \frac{4}{1}$</p> <p>and multiplying through by the reciprocal of the divisor</p> $3 \div \frac{1}{4} = \frac{3}{1} \times \frac{4}{1} = \frac{3 \times 4}{1 \times 1} = \frac{12}{1} = 12.$ <p>Hence, the quotient is obtained by multiplying the dividend by the reciprocal of the divisor.</p> <p>E.g. $\frac{4}{9} \div \frac{5}{7} = n \Rightarrow \frac{4}{9} = \frac{5}{7} \times n$</p> <p>multiply each side by the inverse of the divisor</p> $\frac{5}{7} \text{ to obtain, } \frac{4}{9} \times \frac{7}{5} = n \times \frac{5}{7} \times \frac{7}{5}$ $\frac{4 \times 7}{9 \times 5} = n \times 1$	

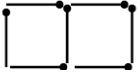

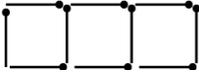

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils:
UNIT 1.3 (CONT'D) FRACTIONS			<p>Therefore $\frac{4}{9} \div \frac{5}{7} = \frac{4}{9} \times \frac{7}{5} = \frac{28}{45}$</p> $n = \frac{28}{45}$ <p>Guide pupils to deduce the rule that to divide by a fraction, multiply the dividend by the reciprocal of the divisor.</p> <p>i.e. $\frac{a}{b} \div \frac{c}{d} = \frac{a}{b} \times \frac{d}{c}$</p> <p>Pose word problems involving division of fractions for pupils to solve.</p>	
UNIT 1.4 SHAPE AND SPACE	1.4.1 draw plane shapes and identify their parts :	Plane shapes	<p>TLMs: Empty chalk boxes, Cartons, Tins, Cut-out shapes from cards. Real objects of different shapes, Solid shapes made from card boards: prisms – cubes, cuboids, cylinders; pyramids – rectangular, triangular and circular pyramids.</p> <p>Guide pupils to identify shapes that have</p> <ol style="list-style-type: none"> congruent sides all sides equal congruent angles <p>Guide pupils to identify shapes that are symmetrical and show the lines of symmetry</p> <p>Assist pupils to classify real objects into various plane shapes such as triangles, right-angled triangles, trapeziums, kite, etc. and solid shapes such into prisms, pyramids etc.</p>	<p>Which of shapes below</p> <ol style="list-style-type: none"> have all sides equal? ave right angles? re prisms? re symmetrical  <p>E.g. Draw rectangle WXYZ and show and name the symmetries</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION																												
UNIT 1.4 (CONT'D) SHAPE AND SPACE	The pupil will be able to: 1.4.2 sort shapes according to given descriptions	Investigations with shapes	Guide pupils to draw plane shapes of given dimensions (such as rectangles, squares and triangles) in square grids, and name their vertices with letters. E.g. The shape PQR in the figure is right angled triangle. Using corners of the grid as vertices, investigate the different right angled triangles that can be drawn in a 3×3 grid and label the vertices.  Identify which of the triangles drawn <ol style="list-style-type: none"> have a pair of congruent sides has the longest side are symmetrical. 	Let pupils:																												
	1.4.3 find the relation between the number of faces, edges and vertices of solid shapes	Relation connecting faces, edges and vertices of solid shapes	Guide pupils to make nets of solid shapes from cards, fold and glue them to form the solid shapes - cubes, cuboids, pyramids, triangular prism, pyramids, tetrahedron and octahedron. Put pupils investigate and record the number of faces, edges and vertices each solid shape has using either the real objects or solid shapes made from cards. Let pupils record their findings using the following table: <table border="1" data-bbox="1131 1166 1686 1374"> <thead> <tr> <th>Solid shapes</th> <th>No. of faces</th> <th>No. of edges</th> <th>No. of vertices</th> </tr> </thead> <tbody> <tr> <td>Cube</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Cuboid</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Triangular prism</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Pyramid</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Tetrahedron</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Octahedron</td> <td></td> <td></td> <td></td> </tr> </tbody> </table>	Solid shapes	No. of faces	No. of edges	No. of vertices	Cube				Cuboid				Triangular prism				Pyramid				Tetrahedron				Octahedron				Find the number of faces, vertices and edges in a hexagonal prism.
Solid shapes	No. of faces	No. of edges	No. of vertices																													
Cube																																
Cuboid																																
Triangular prism																																
Pyramid																																
Tetrahedron																																
Octahedron																																

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 1.5 (CONT'D) LENGTH AND AREA	The pupil will be able to:		 <p>Guide pupils to estimate the areas covered by the shapes (i.e. triangles, rectangles and polygons) whose perimeters were calculated in grids above.</p> <p>Pose word problems involving area of rectangles and squares for pupils to solve</p>  <p>E.g. The T-shape is a net of an open cube. If the area of the T-shape is 180cm^2, what is the length of the side of the cube?</p>	<p>Let pupils:</p> <p>a square board whose area is 100 cm^2. What is its perimeter?</p> <p>determine the area of a square given its perimeter</p> <p>solve word problems involving area of rectangles and squares</p>
UNIT 1.6 POWERS OF NATURAL NUMBERS	1.6.1 find the value of the power of a natural number	Positive powers of natural numbers with positive exponents (index)	<p>TLMs: Counters, Bottle tops, Small stone.</p> <p>Guide pupils to illustrate with examples the meaning of repeated factors using counters or bottle tops.</p> <p>E.g. $2 \times 2 \times 2 \times 2$ is repeated factors, and each factor is 2</p>	<p>write powers of given natural numbers</p> <p>write natural numbers as powers of a product of its prime factors</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
<p>UNIT 1.6 (CONT'D)</p> <p>POWERS OF NATURAL NUMBERS</p>	<p>The pupil will be able to:</p> <p>1.6.2 use the rule</p> <p>(i) $a^n \times a^m = a^{(n+m)}$</p> <p>(ii) $a^n \div a^m = a^{(n-m)}$</p> <p>to solve problems</p> <p>1.6.3 use the fact that the value of any natural number with zero as exponent or index is 1</p>	<p>Multiplication and division of powers</p> <p>Zero as an exponent</p>	<p>Guide pupils to discover the idea of the power of a number</p> <p>E.g. $2 \times 2 \times 2 \times 2 = 2^4$ and 2^4 is the power.</p> <p>i.e. Power $\left\{ \begin{array}{l} \swarrow \text{Index or exponent} \\ \searrow \text{base} \end{array} \right. 2^4$</p> <p>Guide pupils to distinguish between factors and prime factors of natural numbers.</p> <p>Assist pupils to write a natural number as powers of a product of its prime factors</p> <p>E.g. $72 = 2 \times 2 \times 2 \times 3 \times 3 = 2^3 \times 3^2$</p> <p>Guide pupils to perform activities to find the rule for multiplying and dividing powers of numbers.</p> <p>i.e. (i) $a^n \times a^m = a^{(n+m)}$</p> <p>(ii) $a^n \div a^m = a^{(n-m)}$ where $n > m$.</p> <p>Perform activities with pupils to discover that for any natural number a, $a^0 = 1$</p> <p>i.e. (i) $2^4 \div 2^4 = \frac{2 \times 2 \times 2 \times 2}{2 \times 2 \times 2 \times 2} = 1$</p> <p>(ii) $2^4 \div 2^4 = 2^{4-4} = 2^0 = 1$</p>	<p>Let pupils:</p> <p>solve problems involving the use of the rule $a^n \times a^m = a^{(n+m)}$ and $a^n \div a^m = a^{(n-m)}$ where $n > m$</p> <p>solve problems involving the use of the rule $a^n \div a^m = a^{(n-m)}$ where $n = m$</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils:
UNIT 1.7 INTRODUCTION TO CALCULATORS	1.7.1 identify some basic keys on the calculator and their functions	Basic functions of the keys of the calculator Calculator for real life computation	Introduce pupils to some of the basic keys of a calculator and guide them to use it properly. E.g. C, MR, M+, $\frac{+}{-}$, $\sqrt{\quad}$ etc. Guide pupils to compute simple problems involving all the four preparations using the calculator e.g. find the sum $246 + 3.64 - 16.748$ Let pupils use the calculator to solve real life problems involving several digits and/or decimal places. Note: Encourage pupils to use the calculator to check their answers from computations in all areas where applicable.	solve real life problems involving several digits or decimals using the calculator
UNIT 1.8 RELATIONS	1.8.1 identify and write relations between two sets in everyday life	Relations between two sets in everyday life	Guide pupils to identify the relation between pairs of sets in everyday life, like; Ama "is the sister of" Ernest, Doris "is the mother of" Yaa, etc. Guide pupils to realize that in mathematics we also have many relations. E.g. 2 "is half of" 4 3 "is the square root of" 9 5 "is less than" 8 Note: Encourage pupils to work as a team and have the sense of belongingness	find the relation between a pair of given sets make Family Trees of their own up to their grand parents

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION																	
UNIT 1.8 (CONT'D) RELATIONS	The pupil will be able to:			Let pupils:																	
	1.8.4 write relations or mapping as set of ordered pairs	Relation as ordered pair	Guide pupils to write ordered pairs for the mappings A, B and C above. E.g. $A = \{(2,4), (3,6), (8,8), (5,10)\}$ $B = \{(Ama, Saturday), (Kofi, Friday), Yao, Thursday), (Esi, Sunday)\}$ $C = \{(2,4), (3,9), (4,16), (5,25)\}$	write pair of members that satisfy a given relation																	
	1.8.5 find the rule for mapping	Rules for mapping	Guide pupils to state rules for mapping by using the inverse of the relation. To write the rule a variable ordered pair is introduced (x, y) and for the rule, y is expressed in terms of x, (i.e. the inverse relation). E.g. the rule of the mapping A above is the inverse mapping, which is "is twice" or y is two times x, (i.e. $y=2x$). This may be illustrated in a table as shown below <table border="1" data-bbox="1189 826 1624 922" style="margin-left: auto; margin-right: auto;"> <tr> <td style="border: none;">Domain</td> <td style="border: none;">2</td> <td style="border: none;">3</td> <td style="border: none;">4</td> <td style="border: none;">5</td> <td style="border: none;">x</td> </tr> <tr> <td style="border: none;"></td> <td style="border: none; text-align: center;">↓</td> </tr> <tr> <td style="border: none;">Range</td> <td style="border: none;">4</td> <td style="border: none;">6</td> <td style="border: none;">8</td> <td style="border: none;">10</td> <td style="border: none;">$Y=2x$</td> </tr> </table>	Domain	2	3	4	5	x		↓	↓	↓	↓	↓	Range	4	6	8	10	$Y=2x$
Domain	2	3	4	5	x																
	↓	↓	↓	↓	↓																
Range	4	6	8	10	$Y=2x$																
1.8.6 find rule for mappings and use it to solve problems	Investigate patterns for rules	Guide pupils to investigate patterns and find rule for mappings. E.g. Match sticks are used to make the following patterns. <div style="display: flex; justify-content: space-around; align-items: flex-end; margin-top: 10px;"> <div style="text-align: center;">  Pattern </div> <div style="text-align: center;">  Pattern 2 </div> <div style="text-align: center;">  Pattern 3 </div> </div>																			

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 1.9 (CONT'D) ALGEBRAIC EXPRESSIONS	The pupil will be able to: 1.9.3 multiply simple algebraic expressions	Multiplication of algebraic expressions	<p>sum by 3 $(x + 2) \times 3 = 3x + 6$.</p> <p>Think of another number, multiply it by 2, add 4 to the result i.e. $(y \times 2) + 4 = 2y + 4$ Add the results; $(3x + 6) + (2y + 4) = 3x + 2y + 10$.</p> <p>Guide pupils to multiply the given algebraic expressions E.g. (i) $3b \times b$ (ii) $5a \times 2b$ (iii) $4b \times 3b$</p> <p>Guide pupils to perform activities like “think of a number” game which involves multiplying algebraic expressions.</p>	Let pupils: multiply pairs of given expressions including word problems
UNIT 1.10 CAPACITY, MASS, TIME AND MONEY	1.10.1 add and subtract capacities 1.10.2 add and subtract masses of objects	CAPACITY: Addition and subtraction of capacities MASS: Adding and subtracting masses of objects	<p>TLMs: Tea and Table spoons, Soft drink cans and bottles, Measuring cylinders, Jugs and Scale balance</p> <p>Revision: Pupils to estimate capacities of given containers and verify by measuring.</p> <p>Guide pupils to change measures of capacities in millilitres (ml) to litres (l) and millilitres (ml) and vice versa.</p> <p>Perform activities with pupils involving adding and subtracting capacities in millilitres and litres.</p> <p>Revision: Pupils to estimate masses of objects and verify by measuring to the nearest kilogram.</p> <p>Guide pupils to find the masses of familiar objects using scale balance and then add and find their differences</p>	solve word problems involving addition and subtraction of capacities solve word problems involving, addition and subtraction of masses

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils:
UNIT 1.10 (CONT'D) CAPACITY, MASS, TIME AND MONEY	1.10.3 use the relationship between the various units of time 1.10.4 solve word problems involving time 1.10.5 solve word problems involving addition and subtraction of various amounts of money	TIME: Relationships between various units of time Word problems involving the relationship between days, hours, minutes and seconds MONEY: Addition and subtraction of money including word problems	Guide pupils to find the relation between days, hours, minutes and seconds. Take pupils through activities, which involve addition and subtraction of duration of different events. Guide pupils to solve word problems involving the relationship between the various units of time. Guide pupils to add and subtract monies in cedis and pesewas. Pose word problems on spending and making money for pupils to solve	identify the relationship between the various units of time solve word problems involving the relationship between the various units of time solve word problems involving the addition and subtraction of amounts of money solve word problems on spending and making money
UNIT 1.11 INTEGERS	1.11.1 explain situations resulting to concept of integers and locate integers on a number line	The idea of integers (Negative and positive integers)	Discuss with pupils everyday situations resulting in the concept of integers as positive and negative whole numbers. E.g.: 1. Having or owing money 2. Floors above or below ground level 3. Number of years BC or AD Guide pupils to write negative numbers as signed numbers. E.g. (- 3) or (^ 3) as negative three. Use practical activities to guide pupils to match integers with points on the number line.	locate given integers on a number line

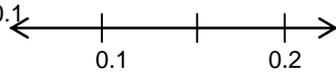

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils:
UNIT 1.11 (CONT'D) INTEGERS	<p>1.11.2 compare and order integers</p> <p>1.11.3 add integers</p> <p>1.11.4 subtract positive integers from integers</p>	<p>Comparing and ordering integers</p> <p>Addition of integers</p> <p>Subtraction of positive integers</p>	<p>Guide pupils to use the number line to compare integers. Guide pupils to arrange three or more integers in ascending or descending order. Guide pupils to use the symbols for greater than (>) and less than (<) to compare integers</p> <p>Introduce how to find the sum of integers using practical situations. E.g. adding loans and savings.</p> <p>Guide pupils to find the sum of two integers using the number line (both horizontal and vertical representation)</p> <p>Guide pupils to establish the commutative and associative properties of integers</p> <p>Introduce the zero property (identity) of addition. E.g. $(-5) + 0 = 0 + (-5) = -5$</p> <p>Introduce the inverse property of addition. E.g. $(-3) + 3 = 3 + (-3) = 0$.</p> <p>Guide pupils to recognize that '-1' can represent the operation 'subtract 1' or the directed number 'negative 1'.</p> <p>Guide pupils to subtract a positive integer and zero from an integer.</p> <ul style="list-style-type: none"> • Use practical situations such as the use of the number line, counters, etc. • Use the property that $a + 0 = a$; $-a + 0 = -a$; $4 + 0 = 4$ and $-4 + 0 = -4$. 	<p>compare and order two or more given integers</p> <p>solve problems involving addition of integers</p> <p>subtract positive integers</p> <p>solve word problems involving subtraction of positive integers</p>

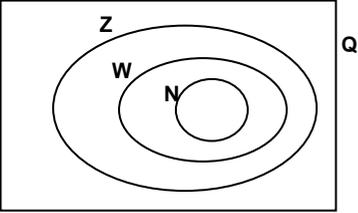

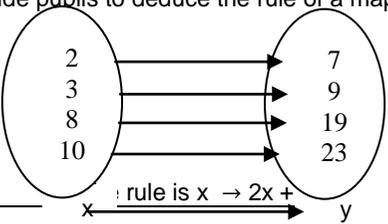

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 1.12 (CONT'D) DECIMAL FRACTIONS	The pupil will be able to:		different forms using equivalent fractions to get denominator a power of 10	Let pupils:
			E.g. $\frac{2}{5} = \frac{2 \times 2}{5 \times 2} = \frac{4}{10} = 0.4$	
	1.12.2 convert decimal fractions to common fractions	Converting decimal fractions to common fractions	Guide pupils to find common fractions from decimal fractions E.g. $0.3 = \frac{3}{10}$, $0.6 = \frac{6}{10} = \frac{3}{5}$ Note: Use practical situations such as the conversion of currencies.	convert common fractions to decimals and vice versa
	1.12.3 compare and order decimal fractions	Ordering decimal fractions	Guide pupils to write decimal fractions as common fractions and order them	order decimal fractions
1.12.4 carry out the four operations on decimal fractions	Operations on decimal fractions	Guide pupils to add decimal fractions in tenths, hundredths and thousandths Guide pupils to subtract decimal fractions up to 3 decimal places Guide pupils to multiply decimal fractions E.g. $0.3 \times 0.7 = \frac{3}{10} \times \frac{7}{10} = \frac{21}{100} = 0.21$ Guide pupils to divide decimal fractions E.g. (i) $0.48 \div 0.2 = \frac{48}{100} \div \frac{2}{10}$ $= \frac{48}{100} \times \frac{10}{2} = \frac{24}{10} = 2.4$ (ii) $0.5 \div 0.5 = \frac{5}{10} \div \frac{5}{10} = \frac{5}{10} \times \frac{10}{5} = 1$ Note: You may encourage the use of calculators to check answers	add decimal fractions up to decimals in hundredths subtract decimal fractions in thousandths solve problems on multiplication of decimal fractions	

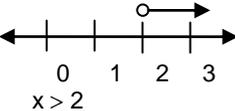

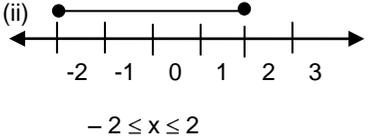

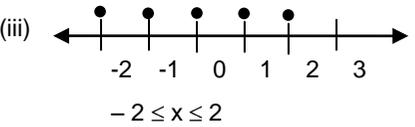

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 1.13 (CONT'D) PERCENTAGES	The pupil will be able to: 1.13.3 solve problems involving profit or loss as a percentage in a transaction	Solving problems involving profit/loss percent	$\text{i.e. } \frac{48}{120} \times \frac{100}{100} = 4 \left(\frac{10}{100} \right) = \frac{40}{100} = 40\%$ <p>guide pupils to establish that the process is shortened as $\frac{48}{120} \times 100\%$</p> <p>Guide pupils to find the profit/loss in a given transaction</p> <p>Guide pupils to express profit/loss as a percentage of the capital/cost price, as; Profit percent = $\frac{\text{profit}}{\text{capital}} \times 100$ Loss percent = $\frac{\text{loss}}{\text{capital}} \times 100$</p>	Let pupils: find the profit/loss percent of a real life transaction
UNIT 1.14 COLLECTING AND HANDLING DATA (DISCRETE)	1.14.1 collect data from a simple survey and/or from data tables 1.14.2 organize data into simple tables 1.14.3 find the Mode, Median and Mean of a set of data	Collecting data Handling Data Mode, Median and Mean	<p>TLMs: newspapers, school records, exercise books, register</p> <p>Guide pupils to carry out simple surveys to collect data, such as marks scored in an exercise, months of birth of pupils, etc</p> <p>Guide pupils to organize the data collected into simple frequency distribution tables</p> <p>Guide pupils to find the mode, median and the mean of discrete data collected.</p> <p>Brainstorm with pupils to find out which of the measures is the best average in a given situation (use practical examples).</p>	collect data from news papers, sporting activities, etc and record them organize data in table form calculate the mode, median and mean from a discrete data

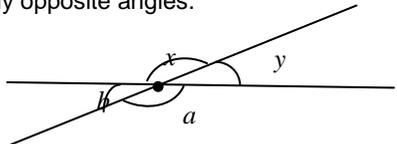

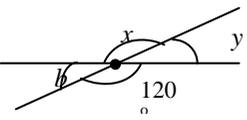

JUNIOR HIGH SCHOOL 2

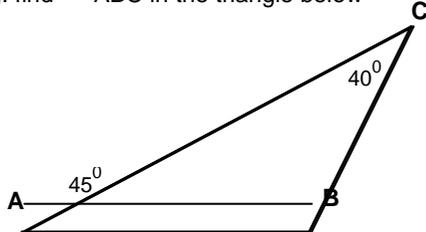

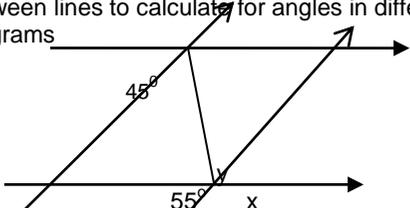

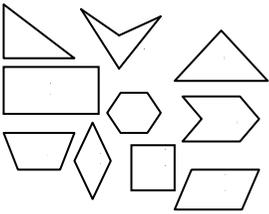

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 2.1 STATISTICS	<p>The pupil will be able to:</p> <p>2.1.1 identify and collect data from various sources</p> <p>2.1.2 construct frequency table for a given data</p> <p>2.1.3 draw the pie chart, bar chart and the block graph to represent data</p> <p>2.1.4 read and interpret frequency tables and charts</p>	<p>Sources of data</p> <p>Frequency table</p> <p>Graphical representation of data</p> <ul style="list-style-type: none"> • pie chart • bar chart • block graph • stem and leaf plot <p>Interpreting tables and graphs</p>	<p>Guide pupils through discussions to identify various sources of collecting data E.g. examination results, rainfall in a month, import and exports, etc</p> <p>Assist pupils to make frequency tables by tallying in groups of five and write the frequencies.</p> <p>Guide pupils to draw the pie chart, bar chart and the block graph from frequency tables.</p> <p>Guide pupils to draw a bar chart for a data presented by a pie chart,</p> <p>Guide pupils to represent a given data using the stem and leaf plot.</p> <p>Guide pupils to read and interpret frequency tables and graphs by answering questions relating to tables and charts/graphs</p>	<p>Let pupils : state various sources of collecting data</p> <p>prepare a frequency table for given data</p> <p>draw various graphs to represent data</p> <p>interpret given tables and charts E.g. answer questions from:</p> <ol style="list-style-type: none"> 1. frequency table 2. pie chart 3. bar chart, etc

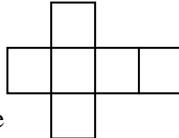

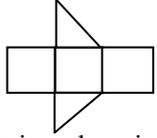

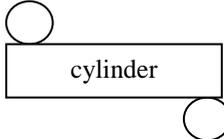

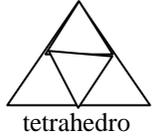

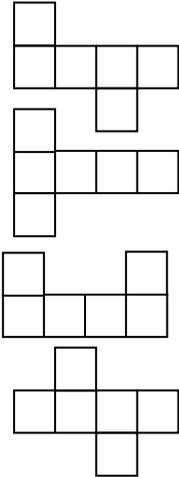

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils :
UNIT 2.2 RATIONAL NUMBERS	2.2.1. identify rational numbers 2.2.2. represent rational numbers on the number line 2.2.3. distinguish between rational and non-rational numbers 2.2.4. compare and order rational numbers	Rational numbers Rational numbers on the number line Rational and non-rational numbers Comparing and ordering rational numbers	Guide pupils to identify rational numbers as numbers that can be written in the form $\frac{a}{b}$; $b \neq 0$ E.g. -2 is a rational number because it can be written in the form $-2 = \frac{4}{-2}$ or $\frac{-10}{5}$ Assist pupils to locate rational numbers on the number line E.g. -1.5 , 0.2 , 10% , $\frac{2}{5}$ $10\% = 0.1$  Guide pupils to express given common fractions as decimal fractions. Assist pupils to identify terminating, non-terminating and repeating decimals. Guide pupils to recognise decimal fractions that are non-terminating and non-repeating as numbers that are not rational Guide pupils to compare and order two or more rational numbers.	identify rational numbers Locate a given rational number on the number line explain why 0.333 is a rational number but π is not arrange a set of rational numbers in ascending or descending order

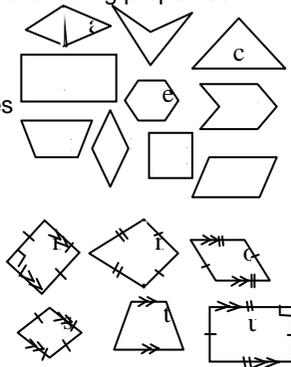

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 2.2 (CONT'D) RATIONAL NUMBERS	<p>The pupil will be able to:</p> <p>2.2.5. perform operations on rational numbers</p> <p>2.2.6. identify subsets of the set of rational numbers</p>	<p>Operations on rational numbers</p> <p>Subsets of rational numbers</p>	<p>Guide pupils to add, subtract, multiply and divide rational numbers.</p> <p>Guide pupils to list the members of number systems which are subsets of rational numbers: {Natural numbers} = {1, 2, 3,...} denoted by N {Whole numbers} = {0, 1, 2, 3,...} denoted by W. {Integers} = {...-2, -1, 0, 1, 2,...} denoted by Z {Rational numbers} denoted by Q.</p> <p>Guide pupils to explain the relationship between the subsets of rational numbers by using the Venn diagram</p>  <p>Assist pupils to find the union and intersection of the subsets. E.g. $N \cap W = N$.</p>	<p>Let pupils :</p> <p>add and subtract rational numbers</p> <p>multiply and divide rational numbers</p> <p>find the intersection and union of subsets of rational numbers</p>
UNIT 2.3 MAPPING	<p>2.3.1. identify mapping as a special relation</p> <p>2.3.2. deduce the rule for a mapping</p>	<p>Idea of mapping</p> <p>Rule for mapping</p>	<p>Revise the idea of a relation between a pair of sets.</p> <p>Guide pupils to identify a mapping as a correspondence between two sets.</p> <p>Guide pupils to deduce the rule of a mapping.</p> 	<p>explain mapping using real life situations</p> <p>i. find the rule for a given mapping</p> <p>i. R is a relation (or mapping) defined by $R = \{(1,2), (2,5), (5,26), (10, 101)\}$. What is the</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 2.4 (CONT'D) LINEAR EQUATIONS AND INEQUALITIE	<p>The pupil will be able to:</p> <p>2.4.4. solve linear inequalities</p> <p>2.4.5. determine solution sets of linear inequalities in given domains</p> <p>2.4.6. illustrate solution sets of linear inequalities on the number line</p>	<p>Solving linear inequalities</p> <p>Solution sets of linear inequalities in given domains</p> <p>Illustrating solution sets of linear inequalities on the number line</p>	<p>Using the idea of balancing, guide pupils to solve linear inequalities E.g. $2p + 4 < 16$ $2p + 4 - 4 < 16 - 4$ $2p < 12$ $p < 6$</p> <p>Guide pupils to determine solution sets of linear inequalities in given domains. E.g. if $x < 4$ for whole numbers, then the domain is whole numbers and the solution set = $\{0, 1, 2, 3\}$</p> <p>Assist pupils to illustrate solution sets on the real number line. E.g. (i)  (ii) </p> <p>Explain to pupils that the illustration of solution sets will look different when given another domain, e.g. integers (iii) </p>	<p>Let pupils :</p> <p>solve linear inequalities</p> <p>determine the solution sets of linear inequalities in given domains</p> <p>illustrate solution sets of linear inequalities on the number line</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
<p>UNIT 2.5</p> <p>ANGLES</p>	<p>The pupil will be able to:</p> <p>2.5.1. discover that the sum of angles on a straight line is 180° and angles at a point is 360°</p> <p>2.5.2. identify and classify shapes by types of angles</p>	<p>Angles on a straight line; Angles on at a point</p> <p>Types of angles</p>	<p>TLMs: Protractor, Cut-out triangles</p> <p>Introduce pupils to the various parts of the protractor (E.g., the base line, centre and divisions marked in the opposite directions)</p> <p>Guide pupils to draw a straight line to a point on a line and measure the two angles formed using the protractor.</p>  <p>Guide pupils to add their results and discover that $x + y = 180^\circ$</p> <p>Guide pupils to extend the line and measure the vertically opposite angles.</p>  <p>Guide pupils to measure the vertically opposite angles and use the results to see that angles at a point is 360°</p> <p>Guide pupils to relate square corner to right angles (i.e. 90°)</p> <p>Guide pupils to identify and classify shapes which have:</p> <ul style="list-style-type: none"> • acute angles • right angles • obtuse angles 	<p>Let pupils :</p> <p>find the value of y in the figure;</p> <p>find the value of $x + b$ in the figure</p>  <p>Which of the shapes below</p> <ol style="list-style-type: none"> i. have acute angles? ii. have right angles? iii. have reflex angles? iv. are symmetrical

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
<p>UNIT 2.5 (CONT'D)</p> <p>ANGLES</p>	<p>The pupil will be able to:</p> <p>2.5.3. discover why the sum of the angles in a triangle is 180°</p> <p>2.5.4. calculate the size of angles in triangles</p> <p>2.5.5. calculate the sizes of angles between parallel lines</p>	<p>Sum of angles in a triangle</p> <p>Solving for angles in a triangle</p> <p>Angles between lines</p> <ul style="list-style-type: none"> vertically opposite angles corresponding angles alternate angles 	<ul style="list-style-type: none"> reflex angles <p>Using cut-out angles from triangles, guide pupils to discover the sum of angles in a triangle</p> <p>Guide pupils to draw triangles and use the protractor to measure the interior angles and find the sum</p> <p>Using the idea of sum of angles in a triangle, guide pupils to solve for angles in a given triangle.</p> <p>E.g. find $\angle ABC$ in the triangle below</p>  <p>Assist pupils to demonstrate practically that:</p> <ol style="list-style-type: none"> vertically opposite angles are equal corresponding angles are equal alternate angles are equal <p>Assist pupils to apply the knowledge of angles between lines to calculate for angles in different diagrams</p> <p>E.g.</p> 	<p>Let pupils :</p>  <p>measure and find the sum of angles in given triangles</p> <p>find the sizes of angles in given triangles</p> <p>find the sizes of angles between lines</p> <p>Calculate for angles in different diagrams</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	<p>The pupil will be able to:</p> <p>2.5.6. calculate the exterior angles of a triangle</p>	<p>Exterior angles of triangles</p>	<p>Guide pupils to use the concept of straight angles to calculate exterior angles of a given triangle</p>	<p>Let pupils :</p> <p>calculate exterior angles of triangles</p>
<p>UNIT 2.6</p> <p>SHAPE AND SPACE</p>	<p>2.6.1 construct common solids from their nets</p>	<p>Common solids and their nets: Cube, cuboid, tetrahedron, prisms, pyramids, cylinders cones</p>	<p>TLMs: Cube, Cuboids, Pyramids, Cones, Cylinders.</p> <p>Revise nets and cross sections of solids with pupils.</p> <p>Guide pupils to identify the nets of common solids by opening the various shapes.</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  <p>cube</p> </div> <div style="text-align: center;">  <p>triangular prism</p> </div> </div> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  <p>cylinder</p> </div> <div style="text-align: center;">  <p>tetrahedro</p> </div> </div> <p>Guide pupils to add flaps to the nets, fold them and glue them to form the solids.</p>	<p>Make solid shapes from nets</p> <p>Which of these cannot be folded into a cube?</p> 

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	<p>The pupil will be able to: 2.6.2 identify and classify quadrilaterals by their properties</p>	<p>Properties of quadrilateral: square, rectangle, parallelogram, kite, trapezium and rhombus</p>	<p>Guide pupils to identify and classify according to one or combination of the following properties –</p> <ul style="list-style-type: none"> • diagonals • congruent sides • congruent angles • parallel sides • right angles • symmetries <p>Given that P = {parallelograms}, Q = {quadrilaterals with all sides equal} and R = {rectangles}; if R, P and Q are subsets of the set U = {m, n, o, s, t and u} illustrated in the box. What is (i) $P \cap Q$? and (ii) $P \cup R$?</p> 	<p>Let pupils :</p> <p>Which of quadrilaterals</p> <ol style="list-style-type: none"> ii. have no acute angles? iii. have reflex angles? iv. have pairs of parallel sides v. have diagonals bisecting at 90° vi. are symmetrical <p>List the labels of the set B, where B={quadrilaterals with two lines of symmetry}</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
<p>UNIT 2.7</p> <p>GEOMETRIC CONSTRUCTIONS</p>	<p>The pupil will be able to:</p> <p>2.7.1 explain a locus</p> <p>2.7.2 construct simple locus</p>	<p>The idea of locus</p> <p>Constructing:</p> <ul style="list-style-type: none"> - circles - perpendicular bisector - bisector of an angle -parallel lines 	<p>Demonstrate the idea of locus as the path of points obeying a given condition</p> <p>Guide pupils to construct the circle as a locus (i.e. tracing the path of a point P which moves in such a way that its distance from a fixed point, say O is always the same).</p> <p>Guide pupils to construct a perpendicular bisector as a locus (i.e. tracing the path of a point P which moves in such a way that its distance from two fixed points [say A and B] is always equal).</p> <p>Guide pupils to construct an angle bisector as a locus of points equidistant from two lines that meet.</p> <p>Guide pupils to construct parallel lines as a locus (i.e. tracing the path of a point say P which moves in such a way that its distance from the line AB is always the same).</p> <p>Perpendicular bisector, equidistant, locus</p> <p>Perpendicular bisector, equidistant, locus</p>	<p>Let pupils :</p> <p>describe the locus of real life activities(E.g. high jumper, 400m runner, etc)</p> <p>describe the locus of a circle</p> <p>Let pupils:</p> <p>bisect a given line</p> <p>bisect a given angle</p> <p>construct a parallel to a given line</p> <p>:</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils :
UNIT 2.7 (CONT'D) GEOMETRIC CONSTRUCTIONS	2.7.3 copy an angle	Copying an angle	Guide pupils to copy an angle equal to a given angle using straight edges and a pair of compasses only	copy a given angle
	2.7.4 construct angles of 90° , 45° , 60° and 30°	Constructing angles of: 90° , 45° , 60° , and 30°	Guide pupils to use the pair of compasses and a straight edge only to construct 90° and 60° . Guide pupils to bisect 90° and 60° to get 45° and 30° respectively.	construct angles: 90° , 60° , 45° and 30°
	2.7.5 construct triangles under given conditions	Constructing triangles	Guide pupils to use a pair of compasses and a straight edge only to construct: <ul style="list-style-type: none"> • Equilateral triangle • Isosceles triangle • Scalene triangle • A triangle given two angles and one side • A triangle given one side and two angles • A triangle given two sides and the included angle 	construct a triangle with given conditions
	2.7.6 construct a regular hexagon	Constructing a regular hexagon	Guide pupils to construct a regular hexagon.	construct a regular hexagon with a given side
UNIT 2.8 NUMBER PLANE	2.8.1 identify and label axes of the number plane	Axes of the number plane	TLMs: Graph Paper, graph board, board instruments Guide pupils to draw the horizontal and vertical axes on a graph sheet and label their point of intersection as the origin (O). Guide pupils to mark and label each of the axes with numbers of equal intervals and divisions.	draw number planes and label the axes

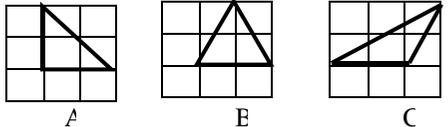

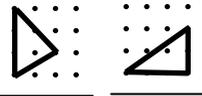

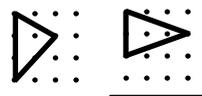

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils :
UNIT 2.8 (CONT'D) NUMBER PLANE	2.8.2 assign coordinates to points in the number plane 2.8.3 locate and plot points for given coordinates 2.8.4 draw graph of set of points lying on a line 2.8.5 draw graph of two linear questions in two variables 2.8.6 find the gradient of a line	Coordinates of points [ordered pair (x, y)] Locating and plotting points The graph of a line	Assist pupils to identify the coordinates of a point and write them as ordered pair (x, y), where the first co-ordinate represent x the distance of the point from the origin along the horizontal axis and the second co-ordinate represent y its distance along the vertical axes. Assist pupils to locate and plot points on the number plane for given coordinates. Guide pupils to plot points (lying on a straight line) and join them with a straight edge to give the graph of a straight line. E.g. plot the points (0, 0) (1, 1) (2, 2) (3, 3) on the graph sheet and join them with a straight edge. Guide pupils to find the gradient of the line drawn.	write down the coordinates of points shown on the number plane plot given coordinates on the number plane draw the graph of a straight line given a set of points calculate the gradient of a line i. from a graph of a line ii. Given two points
UNIT 2.9 VECTORS	2.9.1 locate the position of a point given its bearing and distance from a given point	Bearing of a point from another point	TLMs: Graph sheet, Protractor, Ruler Guide pupils to describe bearing of the cardinal points, North, East, South and West as 000° (360°), 090° , 180° and 270° respectively. Guide pupils to locate the positions of points given their bearings from a given point.	determine the bearing of a point from another point

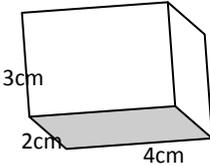

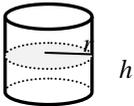

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils :
UNIT 2.10 PROPERTIES OF QUADRILATERALS	2.10.1 identify the properties of rectangle, parallelogram, kite, trapezium and rhombus	Quadrilaterals	<p>TLMs: Cut-out shapes (rectangles, parallelograms, kites, trapeziums and rhombus)</p> <p>Rectangle: Guide pupils to discover that a rectangle is a four-sided plane shape with each pair of opposite sides equal and parallel and the four interior angles are right angles.</p> <p>Let pupils also identify that a square is a rectangle with all sides equal.</p> <p>Parallelogram Guide pupils to discover that a parallelogram is a four-sided plane shape with each pair of opposite sides equal and parallel and each pair of interior opposite angles are equal.</p> <p>Note: Let pupils recognise that a rectangle is also a parallelogram.</p> <p>Kite Guide pupils to discover that a kite is a four-sided plane with each pair of adjacent sides equal.</p> <p>Trapezium Guide pupils to discover that a Trapezium is a four-sided plane shape with only one pair of opposite sides parallel.</p> <p>Rhombus Guide pupils to discover that a Rhombus is a four-sided plane shape with all four sides equal.</p> <p>Note: Differentiate between the square and other types of Rhombus by using the interior angles.</p>	identify types of quadrilaterals from a number of given shapes

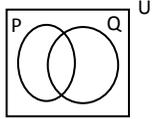

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils :
UNIT 2.11 RATIO AND PROPORTION	2.11.1 express two similar quantities as a ratio	Comparing two quantities in the form a : b	<p>Guide pupils to compare two similar quantities by finding how many times one is of the other and write this as a ratio in the form a : b</p> <p>E.g. Express 12km and 18km as a ratio</p> $\frac{12}{18} = \frac{2}{3}$ <p>i.e. 12 : 18 = 2 : 3</p>	find the ratio of one given quantity to another
	2.11.2 express two equal ratios as a proportion	Expressing two equal ratios as a proportion	<p>Guide pupils to express two equal ratios as a proportion.</p> <p>E.g. 12km, 18km and 6 hours, 9 hours can be expressed as a proportion as follows;</p> <p>12km : 18km = 6 hours : 9 hours</p> $2 : 3 = 2 : 3$ $\frac{12km}{18km} = \frac{6hours}{9hours}$ <p>i.e. $\frac{12km}{18km} = \frac{6hours}{9hours}$</p>	express given ratios as a proportion
	2.11.3 solve problems involving direct and indirect proportions	Direct and Indirect proportions	<p>Guide pupils to solve problems involving direct proportion using:</p> <p>(a) Unitary method</p> <p>E.g. If the cost of 6 items is GH¢1800, find the cost of 10 items;</p> $\frac{1800}{6}$ <p>i.e. Cost of 1 = GH ¢ 300</p> <p>∴ cost of 10 = GH¢300 x 10 = GH¢3000</p> <p>(b) Ratio method</p>	solve real life problems involving direct and indirect proportions

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
<p>UNIT 2.11 CONT'D)</p> <p>RATIO AND PROPORTION</p>	<p>The pupil will be able to:</p> <p>2.11.4 share a quantity according to a given proportion</p> <p>2.11.5 use proportion to find lengths, distances and heights involving scale drawing</p>	<p>Application of proportion</p> <p>Scale drawing using proportions</p>	<p>Express the two quantities / ratios as proportion. The ratios are</p> $6 : 10 = 1800 : n$ $\frac{6}{10} = \frac{1800}{n}$ $n = \frac{10 \times 1800}{6}$ <p>n = 10 x 300 n = GH¢3000</p> <p>Guide pupils to apply proportions in sharing quantities among themselves.</p> <p>E.g. Ahmed and Ernest shared the profit gained from their business venture according to the proportion of the capital each contributed. If Ahmed contributed GH¢100 and Ernest contributed GH¢800 and Ernest's share of the profit was GH¢800, how much of the profit did Ahmed receive?</p> <p>Guide pupils to find lengths, distances and heights involving scale drawings.</p> <p>E.g. The height of a tower of a church building in scale drawing is 2cm. If the scale is 1cm to 20m. How tall is the actual tower?</p> <p>i.e. 1m = 100cm ∴ 20m = 2000cm</p> $1 : 2000 = 2 : h$ $\frac{1}{2000} = \frac{2}{h}$ <p>h = 2 x 2000</p>	<p>Let pupils :</p> <p>apply proportions to solve word problems</p> <p>find the actual distances from scale drawings E.g. maps</p>

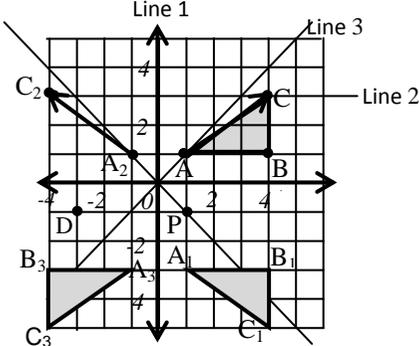

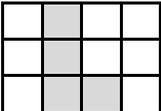

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
<p>UNIT 2.11 (CONT'D) RATIO AND PROPORTIONS</p> <p>UNIT 2.12 RATES</p>	<p>The pupil will be able to:</p> <p>2.12.1 express two quantities as a rate</p> <p>2.12.2 solve problems involving rates</p>	<p>Rate as a ratio of one given quantity to another given quantity</p> <p>Simple interest, Discount and Commission</p>	<p>= 4000cm ∴ actual height = 40m.</p> <p>Guide pupils to recognise rate as the ratio of one given quantity to another given quantity.</p> <p>E.g. A car consumes 63 litres of petrol per week. i.e. 9 litres per day.</p> <p>Explain other examples of rates E.g. bank rates, discount rates etc.</p> <p>Guide pupils to solve problems involving:</p> <p>(a) <u>Simple Interest</u> E.g. Calculate the simple interest on savings of GH¢1000 for one year at 20% interest rate. i.e. $\text{GH¢}1000 \times \frac{20}{100} = \text{GH¢}20$</p> <p>(b) <u>Discount</u> E.g. A discount of 10% is allowed on goods worth GH¢6000. What is the new price? i.e. $\frac{10}{100} \times 6000 = \text{GH¢}600$ ∴ discount = GH¢600 New price = GH¢5400</p> <p>(c) <u>Commission</u> E.g. Calculate 15% commission on a sale of GH¢1000 i.e. $\frac{15}{100} \times 1000 = \text{GH¢}150$</p>	<p>Let pupils :</p> <p>express two quantities used in everyday life as a rate</p> <p>find the simple interest on savings</p> <p>find commission on sales</p> <p>calculate the discount and new price of goods</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
<p>UNIT 2.13</p> <p>AREA AND VOLUME</p>	<p>The pupils will able to:</p> <p>2.13.1 find the area of a triangle</p>	<p>Area of a triangle</p>	<p>TLMs: Cut out shapes: (triangles, rectangles, cubes, cuboids, circles, cylinder), Geoboard</p> <p>Using the geoboard, guide pupils to discover the area of a triangle from the rectangle.</p> <p>Guide stuents to use the relation to find the area of triangles.</p> <p>i.e. Area of triangle = $\frac{1}{2}bh$</p> <p>Guide pupils to draw triangles with given areas in square grids. E.g. Draw triangles with area 2cm^2 in a 3×3 square grid</p> <div style="display: flex; justify-content: space-around; align-items: center;">  </div> <p>Guide pupils to recognise the area of each triangle is half the product of the base (b) and the height (h).</p> <p>Guide pupils to identify the base and heights of different triangles drawn in square grids and find their areas.</p> <p>Ask pupils to draw triangles which have the same area as a given rectangle.</p>	<p>Let pupils:</p> <p>find the area of a given triangle</p> <p>Draw a triangle with area 2cm^2 in a 4×4 square grid</p> <p>Find the area of each triangle in the 1×1 square grid</p> <div style="display: flex; flex-direction: column; align-items: center;"> <div style="display: flex; justify-content: space-around; width: 100%;">  </div> <hr style="width: 100%;"/> <div style="display: flex; justify-content: space-around; width: 100%;">  </div> <hr style="width: 100%;"/> <div style="display: flex; justify-content: space-around; width: 100%;">  </div> </div>

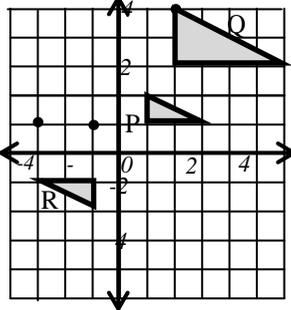

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
<p>UNIT 2.13 (CONT'D)</p> <p>AREA AND VOLUME</p>	<p>The pupil will be able to:</p> <p>2.13.4 calculate the volume of a cylinder</p> <p>2.13.5 solve word problems involving area and volume</p>	<p>Volume of a cylinder</p> <p>Word problems involving area and volume</p>	<p>Guide pupils to relate volume of a prism to the the number of cubes in the uniform cross-section times the height (i.e. number of layers).</p>  <p>Volume (V) of cuboid or Rectangular Prism is given by the uniform cross-sectional area (A) times the height (h), i.e. $V = A \times h = l \times w \times h$</p> <p>Guide pupils to calculate volume of triangular prisms and compound shape that can be divided into rectangles</p> <p>Guide pupils to discover the relationship between the volume, base area (circle) and the height of a cylinder.</p> <p>Guide pupils to deduce the rule for the volume of a cylinder by seeing a cylinder as a special prism whose uniform cross-section is a circle.</p>  <p>Guide pupils to discover the rule for volume of a cylinder as area of the circular uniform cross-section (i.e. πr^2) times the height (i.e. h), i.e. $V = \pi r^2 h$</p> <p>Guide pupils to calculate the volume of a cylinder using the formula $v = \pi r^2 h$</p> <p>Guide pupils to solve word problems involving area and volume of shapes.</p>	<p>Let pupils:</p> <p>calculate the volume of a given cylinder</p> <p>solve word problems involving area and volume of shapes</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 3.1 APPLICATION OF SETS CONT'D)	<p>The pupil will able to:</p> <p>3.1.2 draw and use Venn diagrams to solve simple two set problems</p>	<p>Number of subsets</p>	<p>Guide pupils to find the complement of a set and identify the compliment from a Venn diagram</p> <p>Guide pupils to use the Venn diagram to solve two set problems</p> <p>E.g. At a party 28 people were served with a bottle of beer each; 49 people were also served with tinned minerals. But in all, there were 61 people at the party. Can you explain why?</p>	<p>Let pupils:</p> <p>members of the set $U = \{\text{first five whole numbers}\}$,</p> <p>copy the Venn diagram. Write the members of the sets P and Q in the appropriate regions. Find $P \cap Q$ and $P \cup Q$ solve two set problems using Venn diagrams</p> 
	<p>3.1.3 find and write the number of subsets in a set with up to 5 elements</p>		<p>Guide pupils to write all the subsets of sets with elements up to 5</p>	<p>list the subsets of given sets with elements up to 4</p>
	<p>3.1.4 find the rule for the number of subsets in a set</p>		<p>Guide pupils to find the number of subsets in a set with (i) one element and (ii) two elements, etc.</p> <p>Guide pupils to deduce the pattern made by the number of subsets in sets with various number of elements (0, 1, 2,..., n) as 2^n</p> <p>Note:</p> <ul style="list-style-type: none"> the empty set is a subset of every set every set is a subset of itself 	<p>use the rule to find the number of subsets in a given set</p>

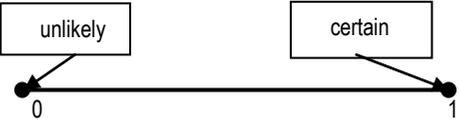

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
	The pupil will be able to:			Let pupils
UNIT 3.2 RIGID MOTION	3.2.1 identify an object (shape) and its image under a translation in a coordinate plane	Translation by a given vector	<p>Revise the components of a vector in the number plane and ask them to trace or draw the path of a vector that take one point to another (its image) in the plane using graph sheets (or square paper). Guide pupils to translate given points using a given translation vector</p> <p>Guide pupils to see in the figure the single movement or transformation that takes the point A to the point (image) B translation by the vector $\begin{pmatrix} 3 \\ 1 \end{pmatrix}$.</p> <p>Guide pupils to find the single transformation that takes (i) the point B to C (ii) the line AB to PQ, and (iii) shape XYZ to its image $X_1Y_1Z_1$</p> <p>Guide pupils to draw a shape and its image under a translation by a given vector.</p> <p>Guide pupils to discuss the properties of objects under reflection with respect to its similarity, congruence and orientation.</p>	<p>draw a shape and its image under a translation by a given vector</p> <p>given points, lines and shapes in a plane, find the single translation movement that takes</p> <p>(i) a point (ii) a line and/or (iii) shape</p> <p>to its image, and stating the points/coordinates of the image</p> <p>given a translation vector and the points/coordinates of the image of a shape, draw the original shape in the coordinates plane.</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
<p>UNIT 3.2 (CONTD)</p> <p>RIGID MOTION</p>	<p>The pupil will be able to:</p> <p>3.2.2 identify objects (shapes) that have reflectional (or fold) symmetries</p> <p>3.2.3 identify an object (shape) and its image under reflection in the major axes of the coordinate plane.</p>	<p>Reflection</p> <p>Reflection in the axes</p>	<p>Let pupils give examples of designs (or objects) in everyday life that have reflectional (or fold) symmetries</p> <p>Guide pupils to identify the line(s) of reflection (or fold) objects/designs</p> <p>Guide pupils to sort objects/designs into those with reflectional designs and those without.</p> <p>Ask pupils to draw and label the axes of the coordinate plane using graph sheets (or square paper) and ask them to label the lines. E.g. Line 1 is y-axis or $x = 0$; line 2 is $y = 3$ and Line 3 is</p> 	<p>Let pupils:</p> <p>draw and describe the line(s) of symmetry of a given geometric shape</p> <p>identify designs in everyday life with reflectional symmetries (e.g. adinkra symbols, logos, etc.)</p> <p>How many different ways can one more square be shaded in this shape to have a line of symmetry.</p>  <p>state the object points/coordinates and its corresponding image points/coordinates in a given reflection</p> <p>draw and state points/coordinates of the image of</p> <ol style="list-style-type: none"> points, lines or shape <p>in reflection in given axes in the coordinate planes</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 3.2 (CONTD) RIGID MOTION	<p>The pupil will be able to:</p> <p>3.2.5 identify a rotation of an object (shape) about a centre and through a given angle of rotation</p>	<p>Rotation</p>	<p>Guide pupils to rotate a shape (object) through a given centre and angle of rotation using graph sheets or square paper</p> <p>Guide pupils to state the object points and its corresponding image points under a given rotation</p> <p>E.g. In the figure, point A_1 is the image of point A under an anticlockwise rotation of 90° about the origin (or an anticlockwise rotation of 270° about the origin). Also the line PQ is the image of line AC under a clockwise rotation of 90° about the origin (or an anticlockwise rotation of 270° about the origin).</p> <p>Guide pupils to locate points which are images to shape(s) under anticlockwise rotation through the angles 90°, 180°, and 270° about the origin (and repeat for clockwise rotation).</p> <p>E.g. the triangle $A_1B_1C_1$ to its image triangle ABC under a clockwise rotation through the angles 90°.</p> <p>Guide pupils to draw and state the points/coordinates of the images of given</p> <ol style="list-style-type: none"> points, lines or shapes <p>under a anticlockwise or clockwise rotation through the angles 90°, 180° and 270°.</p> <p>Guide pupils to discuss the properties of objects under rotation, with respect to its similarity, congruence and orientation.</p>	<p>Let pupils:</p> <p>state the object points/coordinates and its corresponding image points/coordinates in a given rotation</p> <p>draw and state points/coordinates of the image of</p> <ol style="list-style-type: none"> points, lines or shape <p>under a anticlockwise or clockwise rotation through the angles 90°, 180° and 270°.</p> <p>given the points/coordinates of the image of a shape under rotation through a given angle about the origin (90°, 180°, and 270°), draw the original shape in the coordinates plane.</p>

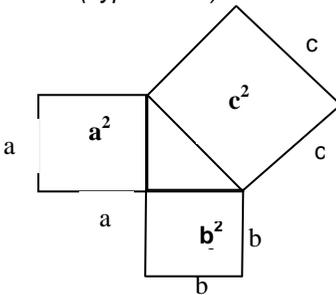

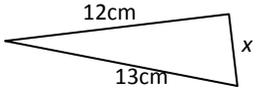

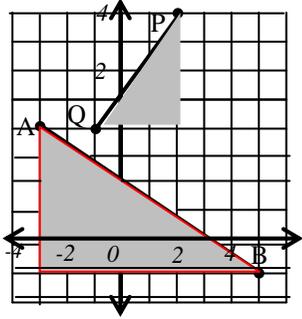

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 3.3 (ENLARGEMENTS AND SIMILARITIES)	The pupil will be able to: 3.3.1 carry out an enlargement on a geometrical shape given a scale factor	Enlargement of geometrical shapes	Guide pupils to draw the enlargement of a geometrical figure with a given scale factor (E.g. triangles, rectangles)  <p>Note: In an enlargement there is a centre of enlargement and a scale factor.</p> <p>Ask students to state the single transformation that</p> <ol style="list-style-type: none"> maps triangle P onto triangle Q maps triangle P onto triangle R in the figure 	Let pupils: draw an enlargement of a shape using a given scale factor
	3.3.2 determine the scale factor given an object and its image	Finding scale factor	Guide pupils to find the scale factor by determining the ratio of the sides of an image to the corresponding sides of the object.	find the scale factor of an enlargement
	3.3.3 state the properties of enlargements, with respect to its similarity, congruence and orientation	Properties of enlargement	Guide pupils to investigate the characteristics of enlargements under the following conditions of the scale factor: <ul style="list-style-type: none"> if the scale factor (K) is negative; if the scale factor (K) is greater than 1 or less than -1; if the scale factor (K) is between -1 and 1 (i.e. a fraction); Guide pupils to discuss the properties of objects under translation with respect to its similarity, congruence and orientation	state properties of enlargement
UNIT 3.3 (CONT'D)	The pupil will be able to:			Let pupils:

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
(ENLARGEMENTS AND SIMILARITIES)	<p>3.3.4 identify an object and its image as similar figures and write a proportion involving the sides of the two figures</p> <p>3.3.5 draw a plan (or model) of object(s) using a given scale</p>	<p>Similar figures</p> <p>Scale drawing as a reduction</p>	<p>Guide pupils to observe that the corresponding sides of similar figures are proportional</p> <p>Guide pupils to identify an object and its image as similar</p> <p>Guide pupils to determine a proportion involving the sides of two similar figures</p> <p>Guide pupils to identify scale drawing as a reduction of a figure. (E.g. scale drawing in map reading)</p> <p>Guide pupils to convert the sizes of real objects to scale.</p> <p>Guide pupils to draw real objects (plane shapes) to scale.</p>	<p>identify similar figures in the environment (as a project)</p> <p>solve problems on proportion involving the sides of similar figures</p> <p>Get the dimensions of a house (by measuring) and draw it using an appropriate scale</p> <p>Calculate real distances on a on a building plan or map using scales on them</p>
UNIT 3.4 HANDLING DATA AND PROBABILITY	<p>3.4.1 read and interpret information presented in tables</p> <p>3.4.2 use probability vocabulary (i.e. likely, unlikely, very likely etc.) to state the chance of events occurring in everyday life</p>	<p>Reading and interpreting data in tabular form</p> <p>Probability terms</p>	<p>Guide pupils to read, process and interpret data presented tables like rainfall charts and VAT/currency conversion tables.</p> <p>Guide pupils to perform experiments and make frequency tables of the results of a random survey or experiment (e.g throwing dice for a given number of times and taking traffic census)</p> <p>Guide pupils to calculate mode, median and mean from frequency distribution tables.</p> <p>Assist students to put probability vocabulary in order of likeliness on a probability scale – impossible, likely, unlikely, equally likely, certain, very likely etc.</p>	<p>process data in tables by finding the</p> <ul style="list-style-type: none"> • minimum • maximum • range • mode • median • mean <p>and using it to interpret and draw conclusions on a given chart</p> <p>Below are statements about real events in our everyday lives.</p> <p>A. A new born baby will be a girl</p> <p>B. It will rain in Winneba in the first week of January</p> <p>On the number line below,</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
<p>UNIT 3.4 (CONT'D)</p> <p>HANDLING DATA AND PROBABILITY</p>	<p>The pupil will be able to:</p> <p>3.4.3 find the relative frequency of a given event</p> <p>3.4.4 find the probability of a given event</p>	<p>Probability-relative frequency</p> <p>Probability of a given event</p>	 <p>Guide pupils to use probability vocabulary to state the chance of events occurring in everyday life.</p> <p>E.g. What is the chance of the following events occurring in everyday life:</p> <p>A. A coin lands Heads side up (i.e. equally likely)</p> <p>B. The day after Monday will be Tuesday (i.e. unlikely)</p> <p>Guide pupils to discuss the meaning of relative frequency (i.e. <i>the number of outcomes of a given event out of the total number of outcomes of an experiment</i>) or (<i>dividing a frequency by the total frequency</i>)</p> <p>Guide pupils to determine the relative frequency of an event.</p> <p>E.g. the relative frequency of an even number showing when a die is thrown is 3 out of 6.</p> <p>Guide pupils to carry out various experiments and find out the possible outcomes.</p> <p>Guide pupils to determine the probability of an event.</p> <p>E.g. the probability of a 3 showing up when a die is thrown is $\frac{1}{6}$.</p> <p>Guide pupils to calculate probability from frequency distribution tables.</p>	<p>Let pupils:</p> <p>use the letters A and B, to mark the point that indicate the chance of the Let pupils:</p> <p>event occurring on a probability scale.</p>  <p>calculate the probability of simple events</p> <p>E.g. probability of hitting a number on a dart</p> <p>determine the relative frequency of an event using frequency distribution tables</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 3.5 MONEY AND TAXES	<p>The pupil will be able to:</p> <p>3.5.1 calculate wages and salaries</p> <p>3.5.2 identify and explain various transactions and services at the bank</p> <p>3.5.3 identify and explain types of insurance and calculate insurance premiums</p> <p>3.5.4 find and explain the income tax payable on a given income</p>	<p>Calculating wages and salaries</p> <p>Transactions and services provided by banks</p> <p>Insurance (premiums and benefits)</p> <p>Income Tax</p>	<p>TLMs: currency in the various denominations, VAT receipts/bills. Guide pupils to identify and explain wages and salaries.</p> <p>Guide pupils to calculate wages and salaries of workers.</p> <p>Guide pupils to identify the basic transactions and services provided by a bank.</p> <p>Guide pupils to find out the meaning of interest rates.</p> <p>Guide pupils to calculate:</p> <ul style="list-style-type: none"> • Interest rates • Simple interest on savings and loans <p>Guide pupils to calculate charges for certain services at the bank (E.g. Bank drafts, Payment order, etc)</p> <p>Guide pupils to identify types of insurance policies.</p> <p>Guide pupils to calculate insurance premiums and benefits.</p> <p>Guide pupils to identify the government agency responsible for collecting income tax.</p> <p>Discuss with pupils incomes that are taxable.</p> <p>Guide pupils to calculate income tax payable by a person earning a given income.</p>	<p>Let pupils:</p> <p>calculate the daily and weekly wages of a worker</p> <p>calculate the monthly and annual salaries of a worker</p> <p>calculate:</p> <ul style="list-style-type: none"> • Interest rates • Simple interest on savings • Interest on loans • Other bank charges <p>calculate total premium paid for an insurance coverage over a given period of time</p> <p>calculate the income tax for a given income</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 3.5 (CONT'D) MONEY AND TAXES	<p>The pupil will be able to:</p> <p>3.5.5 calculate VAT/NHIS on goods and services</p>	Calculating VAT/NHIS	<p>TLMs: currencies in the various denominations, VAT receipts/bills</p> <p>Guide pupils to identify VAT/NHIL as a sales-tax added to the price of goods and services.</p> <p>Guide pupils to identify goods and services attracting VAT/NHIL.</p> <p>Guide pupils to calculate VAT/NHIL on goods and services.</p>	<p>Let pupils:</p> <p>calculate VAT/ NHIL on given goods and services</p>
UNIT 3.6 ALGEBRAIC EXPRESSIONS	<p>3.6.1 change the subject of a formula, substitute values for given variables and simplify</p> <p>3.6.2 multiply two simple binomial expressions</p>	<p>Change of subject Substitution of values</p> <p>Binomial expansion</p>	<p>TLMs: cut-out, algebra tiles</p> <p>Guide pupils to change subjects of formulae that involve the inverses of the four basic operations.</p> <p>E.g.</p> <ul style="list-style-type: none"> • make <i>h</i> the subject of the formula $v = \pi r^2 h$ • make <i>x</i> the subject of the formula $p = 2(x + y)$ <p>Guide pupils to substitute values of given variables into algebraic expressions</p> <p>E.g. Given that $\frac{1}{R} = \frac{1}{R_1} + \frac{1}{R_2}$ find R if $R_1 = 1$ and $R_2 = 3$</p> <p>Revise addition and multiplication of integers with pupils</p> <p>Guide pupils to multiply two simple binomials using algebra tiles or semi-concrete materials (drawings).</p> <p>E.g.</p> <ul style="list-style-type: none"> • $(a + 2)(a + 3)$ • $(a - 2)(a + 3)$ • $(a - 2)(a - 3)$ 	<p>make a variable a subject of a given formula</p> <p>substitute given values into a formula and simplify</p> <p>expand the product of two simple binomials</p>

UNIT	SPECIFIC OBJECTIVES	CONTENT	TEACHING AND LEARNING ACTIVITIES	EVALUATION
UNIT 3.7 (CONT'D) PROPERTIES OF POLYGONS	<p>The pupil will be able to:</p> <p>3.7.2 determine the exterior angles of a polygon</p> <p>3.7.3 use the Pythagoras theorem to find missing side of a right-angled triangle (limit to only the Pythagorean triples)</p>	<p>Exterior angles of regular polygons</p> <p>Pythagoras theorem</p>	<p>Guide pupils to identify the exterior angle of a polygon using practical activities</p> <p>Guide pupils to discover that the sum of the exterior angles of any polygon is 360°.</p> <p>Guide pupils to calculate the size of exterior angles of given regular polygons.</p> <p>Guide pupils to carry out practical activities to establish that <i>“the sum of the squares of the lengths of the two shorter sides of a right-angled triangle is equal to the squares of the length of the longest side (hypotenuse)”</i>.</p>  <p>Guide pupils to form squares on the three sides and compare the areas by arranging unit squares in them and see the relationship $c^2 = a^2 + b^2$</p> <p>Guide pupils to use the Pythagoras theorem to find missing side of a right-angled triangle;</p> <p>Guide pupils to use the Pythagoras theorem to calculate distance between two points, length of lines in the number plane, towns on a map with a square grid background.</p>	<p>Let pupils:</p> <p>find the size of exterior angle of a given regular polygon</p> <p>use the Pythagorean theorem to solve problems on right-angled triangle</p> <p>E.g. Find the value of x in the triangle.</p>  <p>In the number plane, (i) find the distance between the points P and Q; (ii) find the length of line \overline{AB}</p> 

THE MATHEMATICS PANEL

This syllabus was developed by a selected panel consisting of the following:

1. Prof. Damain Kofi Mereku - (Chairman), Associate Professor of Mathematics Education, University of Education, Winneba
2. Mr. Anthony Sarpong - (Co-ordinator), Assessment Services Unit, GES Headquarters, CRDD, Accra
3. Mr. Victor G. Obeng - Lecturer: Assessment in Mathematics (Distance Education) University of Education, Winneba.
Mathematics Tutor, Pope John SHS and Minor Seminary, Koforidua
4. Mr. Opoku Bawuah - Lecturer (Distance Education, UCC), H.O.D. Mathematics & ICT, SDA College of Education, Asokore, Koforidua
5. Mr. J.Y. Muanah - Mathematics Tutor New Juabeng Secondary Commercial, Koforidua. and Former Mathematics Tutor
Ghana Senior High School, Koforidua
6. Mr. P. Dela Zumanu - Vice Dean of Students, Zenith University College, Accra.
7. Mr. Divine Tetteh Daitey - Inspectorate Division, Catholic Education Unit, Koforidua. Former Mathematics Teacher, Presby Women's College of
Education Demonstration JHS, Aburi
8. Mr. Eric Osei-Adofo - Mathematics Teacher, St. Mary's Basic Anglican School, Kasoa
9. Mr. Ernest Agyapong - Mathematics Officer, West Africa Examinations Council, Accra

EXPERT REVIEWERS

Review comments to the syllabus development process were provided by:

1. Dr. Micheal Johnson Nabie Ph.D. - Lecturer, Mathematics Education Department, University of Education Winneba
2. Mr. Benjamin Yao Sokpe, - Lecturer, Department of Science and Mathematics Education, University of Cape Coast
